Product Gallery

TITANIUM ELEMENT

The disc's components contain titanium, which is a durable metal that is resistant to rust, fatigue, and wear. This makes the disc an excellent choice for use in demanding environments. The disc is also made of high-quality materials for long service life.

LIGHT

The disc is designed to be lightweight, making it easy to handle and install. This is especially important for applications where weight is a critical factor.

LASER ENGRAVED

The disc's surface is laser engraved, which provides a smooth, finished appearance. This process also helps to reduce friction and wear, extending the disc's life.

BR-RA7B01-BK

Product specifications	
Part number	BR-RA7B01-BK
Material	Titanium alloy
Finish	Black anodized
Weight	0.15 kg
Dimensions (mm)	100 x 100 x 100
Operating temperature range	-40 to 125 °C
Storage temperature range	-55 to 150 °C
Notes	For use in applications where high performance is required.

BR-RA7B01-BL

Product specifications	
Part number	BR-RA7B01-BL
Material	Titanium alloy
Finish	Black anodized
Weight	0.15 kg
Dimensions (mm)	100 x 100 x 100
Operating temperature range	-40 to 125 °C
Storage temperature range	-55 to 150 °C
Notes	For use in applications where high performance is required.
